Business Analyst with 7 years of IT experience and a background in Project Management. Specialized in managing requirements from the pre-sale/discovery phase through to UAT and project handoffs. Fluent in Agile/Kanban environments, drafting functional/non-functional requirements, and modeling with BPMN/UML diagrams. Currently handling 5 parallel projects across different development phases.

Domains: Media, SaaS, Advertising, GovTech, Mobile, Blockchain/Crypto, Energy/Utilities, Real Estate, Healthcare, IoT.

Experience

HUSPI	Business Analyst
May 2025 - Present	- Managed full BA project lifecycles from the pre-sale phase, concurrently driving 5-6 ongoing projects. - Built documentation packages and product backlogs, defining functional requirements, NFRs, and data entity schemas. - Created BPMN and UML process diagrams to map business workflows and system logic. - Supported project delivery through UAT, test case validation, and design verification, maintaining strict SRS and BRD documentation standards.
Adraba/Codify	Project Manager / Business Analyst
Nov 2019 - Jan 2025	- Managed a high-load platform with 1,000,000+ monthly active users, optimizing delivery workflows by adapting Agile frameworks and establishing KPI tracking. - Translated high-level concepts from multiple stakeholders into structured user flows, technical specifications, and actionable Jira backlogs. - Analyzed business requirements, risks and collaborated directly with customers C-level executives to align the product roadmap with strategic goals.
Adraba	Customer Support Manager
Feb 2019 - Oct 2019	- Resolved technical client requests and escalations, aiming at high-quality issue resolution. - Analyzed user feedback and bug reports, collaborating with the development team to prioritize the backlog. - Authored the initial user guides and technical documentation, establishing the project's internal KB.
